

Human Factors Science
(Formally PPCT)
Threat Pattern Recognition Use of Force (DT)
Instructor Courses

PPCT Management Systems, Inc. has changed their name to PPCT / Human Factor Science. Upon completion of this program, instructors will have the understanding and ability to return to their respective agencies or academies to train officers in these proven techniques. The Threat Pattern Recognition (TRP) Use of Force Instructor course is designed for individual law enforcement and correction agencies to have in-house instructor(s). Having an in-house instructor can reduce the cost of sending officers to outside training, have a qualified instructor to design programs that meet departmental needs and provide training that coincides with department policies.

The New Threat Pattern Recognition Firearms chapter in the manual will enhance officer's response time to a deadly force encounter. This research is the finished product of a seven year study which identified the limitations and capabilities of an officer, during a spontaneous lethal force encounter. A simple and highly effective movement by the officer is used to avoid a spontaneous deadly force threat, while improving officer's firearms accuracy.
