

Free MCOLES Certified Law Enforcement Training

Auto Theft Investigations & Stolen Vehicle Identification for the Patrol Officer

This patrol-based training seminar is specifically designed for road patrol police officers, and investigators tasked with investigating stolen vehicles. Attendees will be instructed in the most comprehensive and current auto theft investigative methods including forensic identification of suspected stolen vehicles, past/present VIN formats, label designs, and locations of factory primary and secondary identification numbers. Attendees will also be briefed on past and present methods used by criminals to alter and conceal the true identity of passenger vehicles; in addition, attendees will also be educated on the most current auto theft trends, other associated crimes to auto theft, case preparation, and an overview of a variety of auto theft related investigative databases.
